FOREWORD

Alberta Parks Services is pleased to provide for your use, the "Park User Statistics, 1992/93" report, covering the period April 1, 1992 to March 31, 1993. This publication is published annually to supply selected information on provincial parks.

Alberta Parks Services provides data on the following aspects of park visitation:

- **Camping Use Statistics** - based on camping permit sales analysis, and/or reasonable estimates of camping use and camper surveys;
- **Day Use Statistics** - collected through Automatic Traffic Counter readings and traffic surveys;
- **Group Camping Use Statistics** - based on group use permit sales analysis; and
- **Fixed Roof Accommodation Use Statistics (Kananaskis Country)** - collected through receipts.

Visitation statistics are reported both at the park or "management unit" level and "area" level (i.e., individual campgrounds, day use areas, group use areas, fixed roof accommodation facilities). Statistics are summarized for provincial parks and recreation areas, and sub-districts within Kananaskis Country. The data collection systems associated with these visitation statistics are discussed in detail in the Introduction Section.

Six years of historical statistics for camping, group camping and day use are included in this report.

In 1992/93 there were 65 provincial parks and 236 provincial recreation areas in the province. All parks, and approximately half of the recreation areas report visitation. Recreation areas that experience marginal visitation do not report use. A number of recreation areas are also being considered for inclusion in future reports. A methodology to collect data on the visitor use of the 3 wilderness areas and 14 ecological reserves in the province is currently not in place.

In addition to visitation, this report provides information covering facilities and services. Visitor services statistics, to include interpretive and environmental use and volunteer statistics, are currently under review. This report also includes maps which show the geographic location of provincial parks and recreation areas, as well as a facilities map specific to Kananaskis Country.

Inquiries regarding the statistics reported in this document or a further explanation of the methodology are welcomed, and should be directed to the Management Information Coordinator at (403) 427-6791.

Copies of this publication are distributed to other Alberta government agencies, all provincial park agencies in Canada, Parks Canada, and selected libraries (e.g., the Alberta Legislature, Alberta Provincial Archives and the National Library of Canada). In addition, copies of this report may be purchased from Management Support Division. Ordering details and prices may be obtained from:

Department of Environmental Protection
Alberta Parks Services
Management Support Division
Management Information Coordinator

INTRODUCTION

This report presents Provincial Park Statistics for the period of April 1, 1992 to March 31, 1993. Information is presented for all Provincial Parks and Recreation Areas operated by Alberta Parks Services and Kananaskis Country, at both the park level and "area" level (e.g., individual campground statistics for those parks with multiple campgrounds).

Provincial park visitation statistics have been reported for approximately the last 30 years. This, however, is only the seventh year of publication of this particular report. Since the first publication in 1986/87, the reporting format virtually remained unchanged. The 1991/1992 report represented the first major formatting change as part of an effort to make the report more complete and to provide users with as much useful information as possible. As part of this process, it is the intention of Management Support Division to phase in additional changes on an on-going basis so as to better suit the current needs of the report users, including senior management.

During the fiscal year of 1991/1992, a number of sites were transferred from the Department of Alberta Transportation and Utilities, and the former Department of Alberta Environment to Alberta Parks Services. Visitation statistics, for a number of these sites, were not available until this publication. To date, visitation data is not collected for the province's 14 ecological reserves and 3 wilderness areas.

Tables summarizing statistics for camping use, campground occupancy, day use, group use, and fixed roof accommodation use statistics are included in this report. It is important to note that individual campground statistics do not include overflow. This statistic is only included at the park level. Selected visitation statistics (e.g., campground turnaways, nights at a specified percent range occupancy for camping, or area nights available/occupied for group use areas) which were reported in the past, are not included in this report. They are, however, available upon request. In addition, visitation data can be further analyzed to meet specific information requirements. These queries should be directed to the Management Information Coordinator. Brief descriptions of the data collection methodologies used for each category of use statistics are presented below.

Camping Statistics Methodology

Camping statistics are based primarily upon information obtained from camping permits. These permits are issued via two systems:

- the Standard Camping Permit system; and
- the Self-Registration Permit (envelope) system.

In the absence of permit sales (e.g., some campgrounds during the off-season: - October to March), reasonable estimates of camping use are provided by park staff. Information collected through these systems is recorded on Park User Statistics Summary (P.U.S.S.) sheets by the Parks, and subsequently forwarded to Management Support Division for data entry and analysis. This information includes data on occupied campsite nights, turnaways, and site closures.

STANDARD CAMPING PERMITS and associated periodic surveys provide information on occupied campsite nights, average camping party size and accommodation unit usage. This information enables calculation of individual camper nights and accommodation unit nights (see Glossary of Terms).

It is important to note that the average number of accommodation units on a site is based on past peak season (April to September) survey results and therefore only the derived accommodation unit nights for the same period are reported. This represents a change from past reports, where accommodation unit nights were reported for the entire fiscal year.

Off-season accommodation unit night figures are equivalent to the occupied campsite nights for the corresponding period. There are no off-season survey statistics available for calculating an average number of accommodation unit nights figure.

Occupied campsite nights are based on the premise that a site is considered occupied when a permit has been issued and that site is occupied by the permittee and at least one camping accommodation unit.

Campground turnaways are recorded each time a camping party is personally turned away because no campsites were available. This information is recorded on monthly P.U.S.S. sheets and is available upon request.

SELF-REGISTRATION PERMITS also provide statistics on occupied campsite nights, and require periodic surveys to provide data on camping party size and accommodation unit usage. Turnaway counts by park staff are not always made owing to the self-administered nature of registration.

It is important to note that, in any self-registration system, non-compliance (i.e., campers not registering) can adversely affect the reliability of camping use statistics. This problem is normally addressed by compliance checks conducted by park staff and the inclusion of non-complying occupied campsite night figures. For provincial recreation areas however, where daily patrols cannot always be done, fewer days are available for non-compliance adjustments resulting in an under-estimation of camping use.

CAMPGROUND OCCUPANCY data are determined from an analysis of:

1. campground capacity,
2. the number of weekday and weekend days in a specific month,
3. the number of sites affected by closures per day; and
4. the total occupied campsite nights per month.

Refer to the Glossary of Terms for the formulas used in calculating campground occupancy rates and average daily percent campground occupancies. A further change to this years report from last year is the reporting of average daily percent occupancy for the peak season months only, since in most instances the occupancy rates in the off-season are negligible. These rates are however available upon request. Overflow unit night figures, whenever appropriate, and

number of campsites for each campground are included in the occupancy data tables.

Backcountry use is collected through a system of user surveys and is reported in the Provincial and Kananaskis Country summary tables as well as in the appropriate District and Sub-District summaries.

Day Use Statistics Methodology

An evaluation of day use data collection procedures in 1981 concluded that the methodology then in use was non-systematic and resulted in day use statistics which were not accurate. Consequently a day use calibration program was implemented in the summer of 1983 and since then, all Provincial Parks have been surveyed as well as the sub-districts within Kananaskis Country.

For the Provincial Parks and the sub-districts within Kananaskis Country, peak season day use statistics are now based on figures collected from automatic traffic counters. Adjustments to these counts include determining the ratio of day use vehicles to all other vehicles entering or exiting the park and mean party size. It is important to note that the ratio of day use to all other vehicles also discounts for multiple visitation to day use facilities or multiple stops along recreation corridors (e.g., the sub-districts within Kananaskis Country). Both the ratio of day use to all other vehicles and mean party size adjustment factors are obtained through a periodic day use calibration survey.

The survey involves stopping traffic on 20 randomly selected days during the peak season to conduct brief interviews. Daily vehicle counts and the survey information are analyzed to yield ESTIMATES of day use visitation. When traffic counter readings are not available, the total vehicle counts are supplemented by estimates. This, plus the fact that adjustment factors obtained from past day use calibration surveys are becoming increasingly dated, serves to illustrate the need to INTERPRET THE DAY USE DATA WITH CAUTION.

It is important to note a significant change to the day use statistics reported for provincial recreation areas. For the majority of provincial recreation areas outside of Kananaskis Country, day use statistics prior to 1989 were calculated using camping figures multiplied by the relative relationship between camping and day use. Beginning in 1989, day use statistics for provincial recreation areas are based upon Automatic Traffic Counter readings as is the case with provincial parks.

The day use methodology for provincial recreation areas adjusts traffic counts for camper traffic (determined from permit sales and estimates of non-compliance and multiple entries/exits) and non-recreational vehicles (from records of park staff) to yield survey information and the estimates of day use visitation. This approach to day use estimation is referred to as the "Residual Method". Due to the change in the collection methodologies at provincial recreation areas, no historical day use comparison is provided prior to the implementation of the residual method.

Group Camping Statistics Methodology

A standard system for collecting group camping use statistics was implemented in 1986. No prior statistics are available. Currently the group use permit system collects information pertaining to group camping unit nights, individual group camper nights, and occupancy. A survey component of the group use permit provides the average number of people in a group unit which is required to calculate individual group camper nights.

Fixed Roof Accommodation Use Statistics Methodology

Occupied room nights and people nights are derived from receipts, summarized and forwarded from Kananaskis Country to Management Support Division via the P.U.S.S. sheet. Unlike previous reports, the number of people nights are based on actual figures as opposed to derived (i.e., using an average party size to calculate people nights).

Historical Comparison

Some of the regional boundaries have changed over the years and as a result, the shifting of regional responsibilities for selected parks has also occurred. It is therefore not possible to compare regional totals, for historical comparison purposes, from one publication to another (the exception being the provincial and park specific totals). This report should be used to that end.

VISITATION HIGHLIGHTS FOR 1992/93

Total Visitation

- Nearly 8.5 million people visited provincial parks and recreation areas during the 1992/93 Fiscal Year. This represents a slight decrease of 2.8 percent from 1991/92.

Camping

- The total number of campsites in operation during the 1992/93 Fiscal Year was 12,772. This represented an increase of 12 percent over the previous year and was a result of a number of recreation areas being transferred from Alberta Transportation and Utilities, and the former Department of Alberta Environment to Alberta Parks Services.
- The total number of campers decreased 2.6 percent from the 1991/92 Fiscal Year, despite the increase in the number of campsites for 1992/93. The fact that mean temperatures for the summer of 1992 were below normal in most regions and compliance was difficult to enforce at a number of the "newer" sites, more than likely contributed to this decrease.
- The vast majority of camping use (97 percent) took place over the summer (i.e., April 1 to September 30).
- Off-season (October 1 to March 31) camping use accounted for 3 percent of total camping. Over half (60 percent) of the total off-season camping use occurred in Kananaskis Country.
- Kananaskis Country accounted for greatest percentage of the total camping use (26.9 percent). West Central region accounted for 22.7 percent, East Central region accounted for 19.8 percent, Southern region accounted for 20.9 percent and the Northern region accounted for 9.7 percent of the total camping use. All regions, with the exception of Kananaskis Country and West Central (where camping use decreased marginally), experienced a slight increase in camping from the 1991/92 Fiscal Year.

Day Use

- An estimated 7 million day use visitors used provincial parks and recreation areas during the 1992/93 Fiscal Year.
- Although the majority (65 percent) of day use visitation took place over the summer, it is important to note that a significant amount of day use visitation (35 percent) took place during the off-season. The majority of winter use however, only occurs at a select few number of sites. For example, nearly one third (27.4 percent) of the total off-season day use occurred at Fish Creek Provincial Park while Strathcona Science Provincial Park and the Elbow and Highway #40 Sub-Districts in Kananaskis Country made up an additional 31 percent of the total off-season use.

- West Central region accounted for nearly half (40.9 percent) of the total day use even though it had the greatest percent decrease (10 percent) in day use visitation from the 1991/92 Fiscal Year. Kananaskis Country accounted for 23.2 percent, East Central region accounted for 16.6 percent, Southern region accounted for 12.9 percent and the Northern region accounted for 6.4 percent of the total day use. The greatest percent increase in day use, from 1991/92, occurred in the Northern Region where day use increased by 29 percent.

Group Use

- Group camping increased by 7.4 percent from the 1991/92 Fiscal Year. Group camping use has been steadily on the increase over the past six years.
- Kananaskis Country accounted for greatest percentage of the total group camping use (34.5 percent). West Central region accounted for 19.5 percent, Southern region accounted for 18.0 percent, Northern region accounted for 14.8 percent and the East Central region accounted for 13.2 percent of the total group camping use. All regions experienced an increase in group camping from the 1991/92 Fiscal Year. Both the Northern and East Central regions had the greatest percent increase in group camping from 1991/92, each at 19 percent.

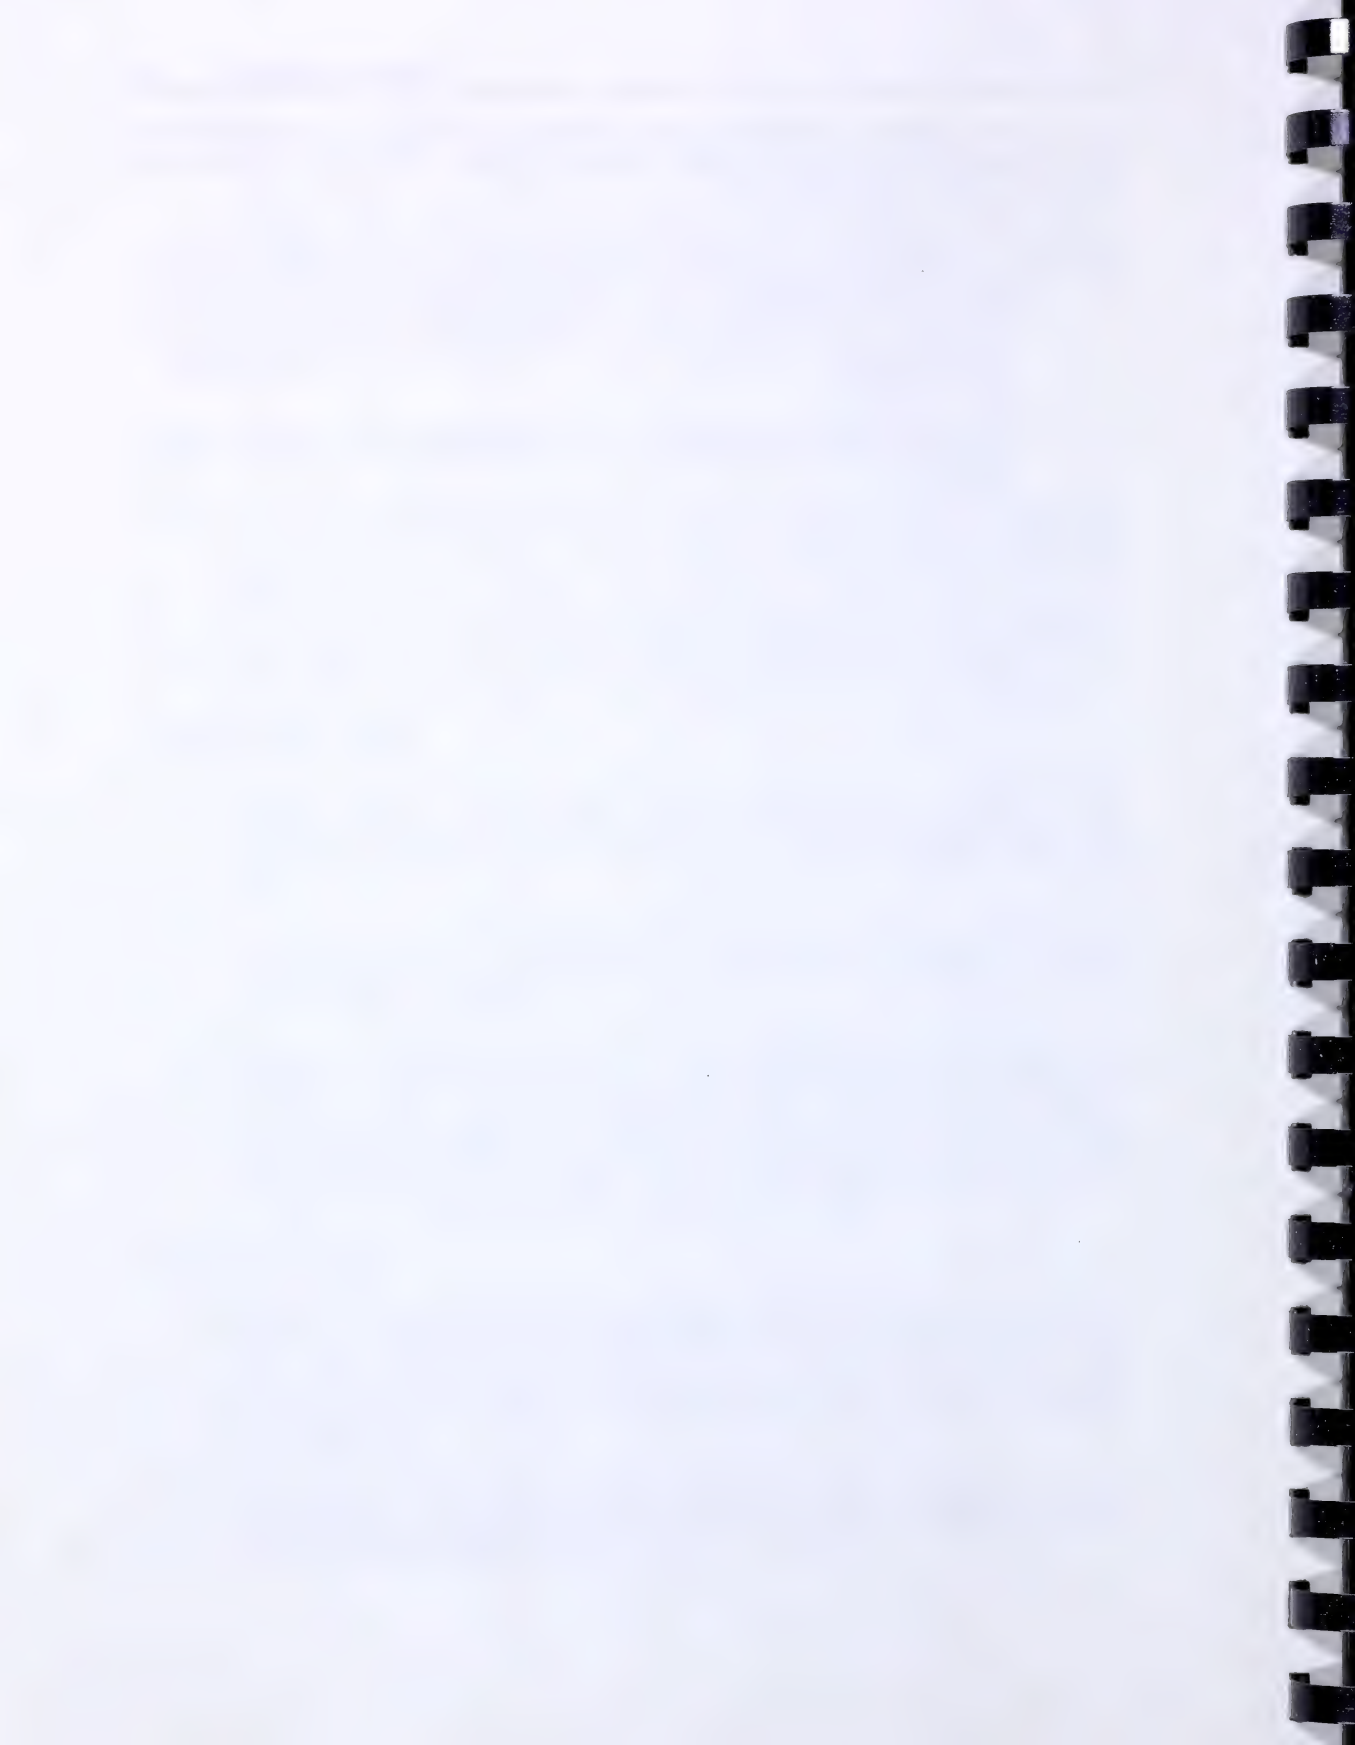

Alberta Parks Services

- Approximately 6.2 million people visited areas operated by Alberta Parks Services during the 1992/93 Fiscal Year. Of these, the majority were day visitors (83.1 percent), 16 percent were campers, and 0.9 percent were group users.
- Comparisons of 1992/93 visitation to that of 1991/92 indicates a slight decrease of 3.5 percent in day use and increases of 1 percent in camping and 10.4 percent in group camping.
- The total number of campsites operated by Alberta Parks Services during the 1992/93 Fiscal Year increased 16.1 percent to 10,244 as a result of a number of recreation areas being transferred from the Department of Alberta Transportation and Utilities, and the former Department of Alberta Environment to Alberta Parks Services. The number of recreation area campsites increased substantially (78.8 percent) from the past Fiscal Year 1991/92.

Kananaskis Country

- Approximately 2.2 million people visited Kananaskis Country during the 1992/93 Fiscal Year. This represents a slight increase over the previous fiscal year. Of these, the vast majority were day users (74.1 percent), 16.6 percent were campers, 8.1 percent stayed in fixed-roof accommodations, and 1.2 percent were group users.
- Approximately one third (27 percent) of camping visitation, 23 percent of day use visitation and 35 percent of group camping during the 1992/93 Fiscal Year took place in Kananaskis Country.

- Comparisons of 1992/93 visitation to that of 1991/1992 indicate decreases in camping (9.3 percent) and day use (2.4 percent), while group use increased slightly by 2.1 percent.
- The total number of campsites operated within Kananaskis Country during the 1992/93 Fiscal Year was 2,528. This represents a marginal decrease (2.1 percent) from 1991/92. For the most part, explanation of the noted decrease in operated campsites can be attributed to the amalgamation of two campgrounds into one, in order to formalize the sites and implement self-registration.
- Visitation to Kananaskis Village increased slightly by 1 percent from 1991/92.

GLOSSARY OF TERMS

CAMPING USE DEFINITIONS

ACCOMMODATION UNIT NIGHTS:

Average number of accommodation units per campsite multiplied by the monthly total of occupied campsite nights.

AVERAGE CAMPING PARTY SIZE:

Average number of people per occupied campsite. This is determined for each area by a periodic survey of camping permits.

AVERAGE DAILY PERCENT CAMPGROUND OCCUPANCY (WEEKEND/WEEKDAY/TOTAL):

Total occupied campsite nights (weekend, weekday, monthly total) divided by Number of sites affected by a closure for each day of the month, subtracted from the campground capacity for each day of the month. Resultant figures are totaled for weekends, weekdays and the month.

CAMPING ACCOMMODATION UNIT:

A tent, a tent-trailer, a travel-trailer, a motorhome, a camperized van, or a truck camper.

CAMPING PARTY SIZE: The total number of people present on an occupied site (regardless of the number of camping accommodation units occupying a site).

INDIVIDUAL CAMPER NIGHTS:

Average camping party size multiplied by the number of occupied campsite nights.

OCCUPIED CAMPSITE NIGHT: One site occupied for one night.

OCCUPIED CAMPSITE: A site that is occupied by at least one camping accommodation unit.

OVERFLOW UNIT NIGHT: One camping accommodation unit in area designated as an overflow area for one night.

SITE NIGHTS AVAILABLE:

Campground capacity multiplied by nights per month minus sites closed per month multiplied by nights affected.

TOTAL OCCUPIED CAMPSITE

NIGHTS: The monthly or seasonal totals of the individual daily sums of occupied campsite nights.

DAY USE DEFINITIONS

AVERAGE DAY USE PARTY SIZE:

Average number of people associated with a vehicle entering a Provincial Park or Recreation Area for one day or portion of one day without staying overnight. This is determined by a periodic survey of day users.

DAY USE PARTY VISIT: Person(s) in a vehicle entering a Provincial Park or Recreation Area for one day or portion of one day without staying overnight.

NOTE: In the case of "walk-in" day users, a party is considered to be one or more individuals who appear to enter the park together.

INDIVIDUAL DAY USERS:

Person(s) making a recreational visit to a Provincial Park or Recreation Area for one day or portion of one day without staying overnight.

GROUP USE DEFINITIONS

GROUP AREA NIGHTS AVAILABLE: Number of group use areas multiplied by nights per month minus group areas closed per month multiplied by nights affected.

GROUP AREA NIGHTS OCCUPIED: Sum of the number of nights a group use area has been actually occupied over a specified period of time.

GROUP UNIT NIGHT: One camping accommodation unit in an area, designated as a group use area for one night.

GROUP INDIVIDUAL CAMPER NIGHTS: Average camping party size multiplied by the number of group unit nights.

FIXED ROOF ACCOMMODATION USE DEFINITIONS

OCCUPIED ROOM/TIPIS NIGHT: One room/tipis occupied for one night.

PEOPLE NIGHTS: Actual number of people per occupied room/tipis.

FACTORS INFLUENCING REPORTED USE:

- (01) - REPORTED USE BASED UPON ESTIMATES
- (25) - SYSTEM NOT IN PLACE FOR DAY USE STATISTICS COLLECTION
- (26) - DAY USE STUDY NOT DONE - NO CALIBRATION FACTORS
- (54) - DATA NOT AVAILABLE FOR SOME AREAS
- (87) - NO TRAFFIC COUNTER IN OPERATION
- (88) - TRAFFIC COUNTER MALFUNCTION
- (91) - DIVESTED

Note: Refer to individual Park tables in text for factors influencing use.

For Kananaskis Country day use figures, the sub-district totals do not sum to corresponding district totals, and subsequent regional totals. This is because day use visitation has been discounted where the route of travel passes through more than one sub-district, thereby avoiding repeated counting of day users.
